FEATURES

- Aries unique universal socketing system allows the socket to be easily configured for any package, on any pitch (or multiple pitch) from 0.2mm or greater, in any configuration, with little or no tooling charge or extra lead-time.
- For Test & Burn-In of CSP, µBGA, Bump-Array, QFN, QFP, MLF, DFN, SSOP, TSSOP, TSOP, SOP, SOIC, LGA, LCC, PLCC, TO and any SMT package style made. Also can be compatible with PGA packaged devices.
- Quick and easy **Probe Replacement System**: the complete set of probes can be removed and a new set (interposer) can be inserted quickly and easily. The old set can be returned to the factory for repair and sent back within one day.
- Pressure mounting, no soldering required.
- 4-point crown (other styles also available) insures scrub on solder oxides.
- Signal path during test only 0.077 [1.96].
- Accommodates any package up to 27mm square.
- Small overall socket size/profile allows max. number of sockets per BIB and BIB’s per oven, while being operator-friendly
- Adjustable pressure pad, with a large tolerance, allows for varying device heights as well as for fine-tuning pressure pad force to meet specific device requirements.
